Heartland's WaveVision application is a fantastic way for your customers to enjoy the benefits of the WaveRider system.

Now, your residents can know, **before they visit the laundry room**, how many machines are available for use, and how much time is left on the machines that are currently running.

Once they start their laundry, they can **monitor the status** of their cycles, on demand, from the convenience of our easy to use mobile-website.

Even better, when a cycle is complete, your customers can receive a **text message** that lets them know their laundry is ready.

- See which machines are available for use
- Verify how much time is left for a cycle
- Get a text message when their socks are dry
Before heading to the laundry room, residents can log into Wave Vision to see if there are any available machines. Confident that there are available machines, the resident can visit the laundry room without wasting any time. The resident swipes their payment card to start their laundry. No waiting, no quarters, no hassle. The resident can now get on with the rest of their day, and receive a text message when their laundry is done.

1. A Customer checks the website to see if machines are available.

2. Two washers are open. The customer is happy. 
Because they didn’t have to carry their laundry down three flights without knowing.

3. The Customer swipes their payment card to start their laundry. No waiting, no quarters, no hassle.

4. The Customer can now get on with the rest of their day, and receive a text message when their laundry is done.

Fast, simple, convenient. mywavevision.com
